

COVID-19 Response

The COVID-19 pandemic has forced many businesses to recede operations to conform with social distancing directives. However, other essential businesses, like Decon, remain open to ensure communities and businesses operate in a safe environment.

Key Highlights

A leader in Ontario's property restoration, construction management, and emergency response verticals

With 11 years of experience, our team of hygienists, project managers, and construction technicians are ready to mobilize

A veteran member of the *Environmental Abatement Council of Ontario*; employs Best Practices Guidelines as a minimum standard

Containment, infection prevention and control

What differentiates Decon is our ability to perform construction operations under *stringent dust control protocol* following the fundamentals of O. Reg. 278/05 and EACO guidelines:

- Installing and monitoring negative air pressure
- Constructing three stage decontamination chambers
- Preventing cross contamination by adhering to the strictest personal protective equipment guidelines

Professional products and solutions

Decon uses proprietary solutions that are derived at a botanical level.

These offer significant advantages over existing products in the market because they provide superior cleaning.

- DIN-registered bactericide, virucide, and tuberculocide
- One-step hospital grade disinfection and cleaning
- No ammonias, chlorines, or glutaraldehydes
- No harsh or lingering fumes
